Diapo 1

Hello my name is Nathan Corberan and going to present you my dioporama on the Evolution of the C Language .

Diapo 2

Therefore I'm going to start by explaining the different points of the presentation:

Diapo 3

the programming language C was created by Brian Kernighan and Dennis Ritchie in 1972 (nineteen twelve) for rewrite unix, to create the C language it was inspired by the B language . The C language to inspire other language for exemple Javascript, PHP, Csharp, C++ and other

Diapo 4

The Csharp (C#) language was created by Anders Hejlsberg in 2002 (two thousand and two). it is used with the framework, this language is used to develop applications, web service and windows software for exemple the game engine ubisoft uses it to create games such as for exemple Rinworld Popular Games.
